

# AHETESHAM KHAN

 AI Engineer & Data Scientist · Automation & Agentic AI

 +91 90215 17413 ·  aheteshamk2003@gmail.com ·  · 

## PROFESSIONAL SUMMARY

AI Engineer and Data Scientist (B.Tech CSE, 2025) specializing in Machine Learning, Deep Learning, NLP, Generative AI, and Agentic AI. Proven ability to build end-to-end AI systems using Python, Flask, REST APIs, and LLM integrations. Skilled across the full data lifecycle — from SQL-based data extraction and Python-driven EDA to Power BI dashboard development and predictive modeling. Hands-on experience with automation workflows using n8n, MLOps practices, and cloud platforms. Seeking an entry-level AI Engineer or Data Scientist role to deliver impactful, data-driven solutions and scalable AI automation systems.

## ★ CORE STRENGTHS

★ Python ★ Machine Learning ★ LLMs & Generative AI ★ NLP ★ Agentic AI (n8n) ★ Flask & REST APIs ★ Power BI

## TECHNICAL SKILLS

 Languages: Python SQL C C++ HTML CSS

 AI / ML: Machine Learning Deep Learning NLP LLMs Generative AI Agentic AI MLOps

 Frameworks & Libraries: Flask Scikit-learn Pandas NumPy TensorFlow PyTorch REST APIs

 Automation & Workflow: n8n Zapier Webhooks API Integration

 BI & Analytics: Power BI Microsoft Excel Tableau MySQL SQLite Google Colab

 AI Platforms: OpenAI API Google Gemini LangChain Hugging Face ChatGPT Integration

 Core CS Concepts: Data Structures & Algorithms DBMS Probability & Statistics Operating Systems

 Cloud & DevOps: AWS (Cloud Practitioner) Docker Git GitHub

## PROJECTS

### ▸ Agentic AI Automation Workflow with n8n (2026)

n8n LLM Agents REST APIs Webhooks

- ▶ Designed and deployed an end-to-end agentic AI automation workflow using n8n, integrating LLM-powered agents with enterprise tools, databases, and APIs to automate complex business processes.
- ▶ Built multi-step workflow automations that dynamically route data, generate intelligent responses, and trigger downstream actions based on contextual AI reasoning.
- ▶ Integrated webhooks, REST APIs, and database connectors to create seamless data pipelines with real-time monitoring and error handling capabilities.
- ▶ Automated repetitive tasks across email, CRM, and data entry workflows, reducing manual intervention time by 60%.
- ▶ Implemented agentic decision-making logic with conditional branching, enabling the system to autonomously execute multi-step operations without human input.

### ▸ AI-Powered Professional Chatbot (2024 – 2025)

Python Flask NLP MySQL/SQLite REST APIs

- ▶ Designed and deployed a production-ready AI chatbot using Python, Flask, and NLP to process real-time user queries with intent classification and dynamic response generation.
- ▶ Integrated MySQL/SQLite relational databases for persistent chat history storage, enabling session continuity and structured data retrieval.
- ▶ Architected a scalable RESTful API backend decoupling frontend and backend layers, deployed via a responsive web interface built with HTML/CSS.
- ▶ Applied NLP-based intent recognition pipelines using SpaCy and transformers to achieve accurate query routing and contextually relevant responses, improving chatbot reliability.

- ▶ Followed modular software architecture principles to ensure maintainability and extensibility for future LLM integrations, including OpenAI and Gemini API-based enhancements.

▶ **Power BI Dashboard Development** *(Skill Academy Internship, 2024)*

Power BI DAX

- ▶ Completed a 30-day intensive Power BI workshop and internship, developing interactive dashboards and data visualizations for business analytics use cases.
- ▶ Worked on real-world datasets to create KPI-driven reports, enabling stakeholders to make data-informed decisions.
- ▶ Automated recurring report views to reduce manual dashboard refresh effort.

▶ **Real-World Data Analytics & Dashboard Projects** *(2023 - 2024)*

Python SQL Power BI Excel Pandas NumPy

- ▶ Solved 30+ real-world data analytics challenges involving SQL queries, Python-based data wrangling, and Excel pivot analysis across diverse industry datasets.
- ▶ Built interactive Power BI dashboards visualizing KPIs, business trends, and performance metrics from raw structured data sources.
- ▶ Performed end-to-end EDA and data cleaning workflows using Pandas, NumPy, and SQL to surface actionable insights from messy, inconsistent data.

▶ **Data Science Certification Program** *(2025)*

Python SQL Power BI Excel ML Capstone Projects

- ▶ Completed a comprehensive Data Science certification covering Python, SQL, Power BI, Excel, and Machine Learning fundamentals.
- ▶ Applied statistical analysis and predictive modeling techniques to solve business problems in capstone projects.

## EDUCATION

**B.Tech, Computer Science Engineering** — Dr. Babasaheb Ambedkar Technological University, Maharashtra *(2021 - 2025)*

**Key Coursework:** Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, LLM Models, MLOps, Data Structures & Algorithms, DBMS, Probability & Statistics, Operating Systems

**HSC — Science** — BZ High School and Junior College *(2018 - 2020)*

## CERTIFICATIONS

Data Analytics Essentials Ace Data Scientist AWS Cloud Practitioner Foundation Course Machine Learning with Python (Free Course)

Python Certification Microsoft Power BI

## SOFT SKILLS

Analytical Thinking Problem-Solving Quick Learner Effective Communication Team Collaboration Ownership & Accountability

Adaptability Detail-Oriented
